

Participating Company Profiles

Prepared for B2B matchmaking | October 2026

This document provides a short introduction to the Slovenian companies currently participating in the delegation. It is intended to help UK businesses identify relevant potential partners ahead of the B2B sessions. The document will be updated as additional companies register.

LynxCraft d.o.o.

AI-supported homebuilding platform connecting design, project control and a vetted construction ecosystem

Industry

Architecture, construction technology and proptech

LynxCraft is a Slovenian construction technology company developing Lynx Copilot, an AI-supported platform designed to simplify the homebuilding process for private investors. The platform combines early-stage feasibility analysis, cost estimation and planning-rule checks with access to certified architects, contractors and project-management support. It is designed to give homebuilders clearer oversight of budget, schedule, documentation and key decisions from the first concept through construction. LynxCraft's wider ambition is to create a scalable homebuilding ecosystem that connects private investors with professional service providers and suppliers through a more structured, technology-enabled process.

Strip's d.o.o.

End-to-end development and manufacturing of customised electronic and mechatronic solutions

Industry

Electronics development and production, ODM/EMS

Strip's is a Slovenian electronics and mechatronics company with more than 30 years of experience in developing and manufacturing customer-specific solutions. Operating as both an ODM and EMS partner, the company supports projects from concept design and prototyping through industrialisation, serial production, quality assurance and logistics. Strip's has its own R&D and manufacturing capabilities and works across lighting, household and professional appliances, automotive, medical technology, e-mobility, smart energy and IoT. Its production capabilities include PCBA, testing and box-build assembly, supported by internationally recognised quality and environmental management standards. The company is suited to partners seeking a flexible European development and manufacturing partner for specialised electronic products.

ETREL d.o.o.

European AC charging solutions for public, workplace, fleet and private EV infrastructure

Industry

E-mobility, with a focus on AC charging stations

Etrel is a Slovenian developer and manufacturer of AC electric-vehicle charging solutions for public, workplace, fleet and private charging networks. Founded in 2007, the company has built several generations of smart charging products that are deployed across European markets. Its current portfolio includes the INCH Pro and INCH Duo charging stations, designed for reliable operation, intuitive use and integration with charge-point management and energy systems. Etrel's technology supports dynamic load management and smart-grid interaction, helping operators deploy charging infrastructure where available grid capacity may be limited. The company focuses on long-life hardware, flexible configurations and practical solutions for charge-point operators and infrastructure partners.

Leadership Solutions d.o.o.

Boutique executive search and leadership advisory with a focus on human capital risk

Industry

Management consulting

Leadership Solutions is a Slovenian boutique management consulting firm specialising in executive search, leadership advisory and human capital risk assessment. The company works with senior executives, leadership teams and boards on appointments, succession, leadership assessment and development, as well as broader strategic people decisions. It also applies a human-capital perspective to mergers and acquisitions, assessing leadership capability, key-person dependencies, organisational culture and other people-related risks that can affect transaction value and post-deal performance. Its work also includes board effectiveness and executive compensation benchmarking. The firm operates locally and internationally and is positioned for organisations seeking senior leadership expertise, executive talent or people-risk support during growth, transformation or investment.

Ograje Kočever d.o.o.

Slovenian manufacturer of fencing systems, gates and customised perimeter solutions

Industry

Fencing systems manufacturing, gates and perimeter solutions

Ograje Kočever is a Slovenian manufacturer of fencing systems, gates and related perimeter solutions, with its own production and development capabilities. The company has more than 15 years of experience and provides a complete service from design and planning through manufacture, installation and assembly. Its portfolio includes panel and premium fences, gates, automation, accessories, balconies and stair railings, with solutions for residential, commercial and industrial applications. Ograje Kočever manufactures more than 6,000 fencing systems and installs over 180 kilometres of fencing each year. Its in-house know-how, made-to-order production and turnkey delivery make the company a potential partner for UK distributors, contractors, developers and other businesses seeking Slovenian-made fencing and perimeter solutions.

Codex d.o.o.

International supplier of bearings and driving elements for distributors and OEM manufacturers

Industry

Bearings, power transmission, and industrial components

Codex is a Slovenian supplier of bearings and driving elements with more than 30 years of experience in international markets. Founded in 1993, the company works with more than 450 distributors and 180 OEM customers across over 40 countries. Its portfolio includes bearings and bearing units, chains, sprockets, belts, seals, retaining rings and linear motion products, with more than 25,000 items available across its wider range. Codex also supports OEM manufacturers with the development and supply of non-standard components and modified sizes for specific applications. Product quality is supported by continuous inspection and in-house testing procedures. With an established international distribution network, dedicated B2B ordering platform and experience across sectors including agriculture, electric motors, appliances and industrial equipment, Codex is particularly relevant to UK distributors and manufacturers seeking a European supply partner for standard and customised industrial components.

ELES d.o.o.

Slovenia's national electricity system operator, responsible for the secure operation and development of the power grid

Industry

Energy, electricity transmission and distribution, power system infrastructure

ELES is Slovenia's state-owned combined transmission and distribution system operator, responsible for the safe, reliable and uninterrupted operation of the country's electricity system. The company plans, develops, operates and maintains Slovenia's high-voltage transmission network at 400 kV, 220 kV and part of the 110 kV level, while also managing system balancing and cross-border electricity flows. Slovenia's grid is closely interconnected with neighbouring European electricity systems, and ELES is actively involved in international cooperation and projects focused on the development of smarter and more resilient power networks. The company is particularly relevant to partners working in power infrastructure, smart grids, energy storage, digitalisation, automation and cybersecurity.

IONEX d.o.o.

Slovenian developer and manufacturer of air ionizers based on patented carbon-brush technology

Industry

Air purification, indoor air quality and ionisation technology

IONEX is a Slovenian developer and manufacturer of air ionizers, founded in 2003 by innovator Lorena Leonardos. The company develops and produces devices using its patented carbon-brush technology to generate high concentrations of negative ions without ozone. Its product range includes ionizers for homes and offices, vehicles, saunas and wellness facilities, as well as specialist audio environments. The devices operate without fans or replaceable filters and are designed for continuous, silent use. IONEX has also expanded its technology into HVAC and automotive applications, while its IONEXAir project received support through the EU Horizon 2020 programme. The company is particularly relevant to UK distributors, wellness and hospitality businesses, automotive partners, and companies working with indoor air quality and healthy-building solutions.

Pure Power NOW (BPT d.o.o.)

Renewable energy platform combining hydropower generation, commercial real estate, and energy innovation

Industry

Renewable energy, energy technology, commercial real estate and climate tech

Pure Power NOW is a Slovenian energy and innovation platform based at the former BPT industrial complex in Tržič. The company produces up to 22,000 MWh of renewable electricity annually through four renovated and automated small hydropower plants with a combined capacity of 3.8 MW, while also developing commercial real estate and supporting energy and climate-tech innovation. The BPT site is being developed as an energy-resilient environment where new solutions can be tested and validated, with planned integration of solar generation, battery storage and advanced energy management systems. For B2B cooperation, Pure Power NOW is interested in technology partners working in renewable energy, energy storage, energy management and energy-efficient building renovation, companies seeking an EU environment in which to test energy solutions, and investors and partners for joint development projects.

Analitica d.o.o.

Advanced software, analytics and AI solutions for energy, finance and manufacturing

Industry

ICT, financial technology, energy software, artificial intelligence and Industry 4.0

Analitica is a Slovenian software development and consulting company combining expertise in finance, natural sciences and engineering with advanced information technology. Its solutions cover financial management and risk, electricity distribution, advanced analytics and manufacturing quality assurance. For electricity distribution operators, Analitica develops PowerNet Explorer™, a platform for network topology modelling, digital grid representation and advanced energy analytics. Its financial software supports portfolio management, asset and liability management, treasury, credit risk and IFRS 9 and IFRS 17 processes. In manufacturing, the company develops AI-supported and computer-vision solutions for automated quality control, including hyperspectral imaging and predictive quality models. For B2B cooperation in the UK, Analitica is interested in potential partners and end customers in electricity distribution, particularly distribution network operators and IDNOs, smaller insurance companies and pension funds, as well as manufacturers seeking advanced quality-control solutions.

TEŠ d.o.o.

Slovenian thermal power and district-heating operator with extensive experience in large-scale generation assets

Industry

Energy, thermal power generation and district heating

TEŠ, the Šoštanj Thermal Power Plant, is Slovenia's state-owned thermal power and district-heating company, with extensive experience in operating large-scale generation assets. Until the end of 2024, its principal activity was the production of electricity and heat for Slovenia's power system and district heating in the Šaleška Valley. Since 2025, its role has changed as part of Slovenia's transition away from coal, with the company continuing to provide district heating and manage its existing energy infrastructure. Its generation assets include large steam-turbine units, including the 600 MW Unit 6, equipped with an ALSTOM three-part steam turbine system. TEŠ is particularly interested in connecting with companies with operational and technical experience in turbine-generator units and power-generation facilities, including expertise relevant to the operation, maintenance and future use of such assets.

IM d.o.o.

Development and manufacturing partner for customised mechatronic components and systems

Industry

Mechatronics, automotive, smart home, healthcare, industrial technology and contract manufacturing

Intelligent Mechatronics is a Slovenian development and manufacturing company specialising in customised mechatronic solutions. With around 750 employees, €114 million in revenue and production facilities in Slovenia and Bosnia and Herzegovina, the company develops components to customer specifications and manufactures them in serial volumes. Its capabilities include customised rotary and linear actuators, BLDC and DC motors, solenoids, electromagnetic valves, electromechanical pumps, injection moulding, precision stamping and stamped heat sinks for electronics cooling. The company also supports the development and assembly of complete devices through to final packaging. Its customers include Brose, Continental, Valeo, BSH, FORVIA/HELLA, Danfoss, TE Connectivity and Philips. For B2B cooperation, Intelligent Mechatronics is particularly interested in Tier 1 and Tier 2 automotive suppliers, manufacturers of smart home and personal care products, companies in HVAC, energy and automation, power-electronics manufacturers, and businesses looking to transfer production from Asia or establish an EU or Balkan manufacturing partner. The company is seeking meetings around joint product development, component optimisation, second-source supply and contract manufacturing, particularly for medium- and high-volume production.
